

SAFETY AND SECURITY SOLUTIONS

Your Guide to Our Top Solutions for
Safer and More Secure Environments

If you are at all involved in queue operations or management for an airport, entertainment venue, retail store, bank, or any other business, you are well aware of the challenges. From maintaining public safety, to ensuring a quality customer experience, to enhancing the operational performance of your queues, you have a lot to juggle.

You'll be encouraged to learn that it is possible to address each of these challenges effectively and simultaneously with a well-planned approach. And of course, with the right set of products.

In this quick guide, we focus on safety and security by featuring some of our top queuing products.

Solutions featured in this guide will help you:

- **Create orderly queuing areas**
- **Guide customers to, through, and out of the queue**
- **Clearly delineate off-limits areas**
- **Establish barriers around or within service areas**
- **Communicate important safety and security information**
- **Enhance public and employee safety**

WHAT'S INSIDE?

BELTRAC® STANCHIONS AND SIGN FRAMES

RETRACTABLE BELT WALL MOUNTS

JETTRAC™ DUAL

MAGNETIC BASE POSTS

BELTRAC® SWING GATES

NEXTRAC® GATES AND RIGID RAIL BARRIERS

POST AND PANEL BARRIERS

POST & SHIELD™ BULLET RESISTANT PANELS

BELTRAC® STANCHIONS AND SIGN FRAMES

The industry standard for queues and crowd control.

Beltrac's® rugged construction and safety features make it the perfect choice for areas that handle heavy traffic.

- 4-way belt connection allows extreme flexibility when setting up queues.
- Viscous dampening belt-braking system ensures a slow and safe belt retraction.
- Weighted steel base with slotted rubberized feet provides superior stability.
- Rounded-edge sign frames eliminate hazard from sharp corners.

RETRACTABLE BELT WALL MOUNTS

Always ready for action.

Create a convenient, always available barrier for areas or passages that require temporary restricted access such as security corridors or areas temporarily closed for maintenance.

- Mounts to a wall or other flat surface in minutes, providing a convenient, instant barrier.
- Choose from standard safety messages or create your own.
- Magnetic option allows barrier to be instantly moved from one location to another.

JETTRAC™ DUAL

Quickly define safe zones for large areas.

Create an instant barrier with two belts that extend up to 65' for a total of 130 linear feet of coverage. JetTrac™ Dual clearly and quickly defines safe zones for large areas.

- Belts easily extend in any direction.
- Belts are weather-resistant, anti-static.
- Large wheeled base makes it easy to transport.
- Compact design requires little storage space.

MAGNETIC BASE POSTS

Keep posts firmly in place.

When you need more security and control over your queues — without being married to just one configuration — a magnetic base offers the ideal compromise. Designed for high-traffic venues that require sturdy stanchions with flexibility, the magnetic base attaches firmly to the steel plate keeping the stanchion upright and your queuing configuration intact until you're ready to rearrange.

- Strong magnetic base keeps post firmly in place.
- Post quickly removes from floor plate when needed.
- Small footprint offers a clean, contemporary look and maximizes floor space.
- No core drilling necessary.

BELTRAC® SWING GATES

Improve access control in minutes.

Use portable swinging gates to visually alert and temporarily block customers from restricted areas. The spring loaded gate is easily attached to any Beltrac® post to create an instant access gate in a matter of minutes.

NEXTRAC® GATES AND RIGID RAIL™ BARRIERS

Sleek rigid rail creates modern, secure-access barriers and partitions.

The flexibility and versatility of Rigid Rail™ Barriers make them equally at home in the queue, as structural barriers for secure areas or as a partition wall. Insert a NeXtrac® Gate at any point to provide a secure access point.

- Create a more secure perimeter around the queue.
- Add a structural barrier to restricted access areas.
- Create Privacy Rooms or divide an open space.

POST AND PANEL BARRIERS

Create a well-defined barrier.

Panel barriers work seamlessly with Beltrac® posts using small yet flexible hinge connectors to allow for a full range of panel positions.

- Visually define the lines of the queue.
- Create a solid structural perimeter around a queue or restricted area.
- Easily insert graphics or use black inserts to create opaque barricades.

POST & SHIELD™ BULLET RESISTANT PANELS

Portable security against ballistic threats.

Where public and employee safety is a key concern, portable bullet proof panels are worth considering. Post and Shield panels provide exceptional stability and proven protection against ballistic threats.

- Works with Beltrac® Post and Panel systems.
- Bullet resistant fiberglass panels offer superior security against bullets and blast fragments.
- Woven-roving fiberglass with resin panels capture ballistic projectiles without ricochet or spalling.
- Low wicking, non-toxic materials prevent the build-up of mold.
